POOL AND SPA FILTRATION

Spa Filters • DE Grids • Pool Filters • Filter

LIMITED WARRANTY • FILBUR Manufacturing

Limited Warranty. FILBUR Manufacturing warrants that its cartridges and grids will be free from defects in material and/or workmanship for one (1) year from date of purchase. This warranty does not extend to ordinary wear and tear, misuse, and/or failure to maintain the products. Documentation of date of purchase is required. FILBUR may require the return of product for determination of warranty eligibility in the reasonable discretion of FILBUR Manufacturing. FILBUR Manufacturing disclaims all other express or implied warranties, including without limitation, any implied warranties of merchantability or fitness for a particular purpose.

Limitations of Liability. FILBUR Manufacturing's Limited Warranty applies only to new FILBUR Manufacturing filter cartridges, grids, and accessories purchased from FILBUR Manufacturing or an approved affiliate of FILBUR Manufacturing. FILBUR Manufacturing disclaims any warranty against claims of patent or trademark infringement. In the event of any judicially established claim of patent or trademark infringement, FILBUR Manufacturing may obtain an appropriate license on purchaser's behalf. Only in the event that FILBUR Manufacturing does not obtain such a license for purchaser, purchaser's sole remedy shall be to return any unused goods that are in resalable condition for refund. Purchaser assumes all risks whatsoever from the use of FILBUR Manufacturing products. In the event of delivery of non-conforming or defective product, purchaser's sole and exclusive remedy shall be to return such non-conforming or defective product for replacement at no additional charge by FILBUR Manufacturing or, in the event the product cannot be replaced, for refund or credit.

General Statement of Quality. FILBUR Manufacturing is a private label manufacturer of filter cartridges and grids for original equipment manufacturers (OEMs) under their brand names according to their specifications. FILBUR Manufacturing also manufactures replacement grids and cartridges under the FILBUR Manufacturing brand for those OEMs' products and for other OEMs for which it is not a private label OEM supplier. FILBUR Manufacturing has endeavored to make its aftermarket replacement products equal to or better than the OEM products for which they serve as replacements. FILBUR Manufacturing makes no claim that its FILBUR Manufacturing branded cartridges and grids are manufactured or endorsed by the OEMs.

DISCLAIMERS: FILBUR MANUFACTURING SHALL HAVE NO LIABILITY FOR ANY OTHER DAMAGE OF ANY KIND, INCLUDING WITHOUT LIMITATION SHIPPING, LABOR, INSTALLATION OR ANY OTHER LOSSES OR DAMAGES. FILBUR MANUFACTURING SHALL NOT BE NOT LIABLE TO PURCHASER OR ANY THIRD PARTY FOR DIRECT, INDIRECT, CONSEQUENTIAL, INCIDENTAL, PUNITIVE, EXEMPLARY, OR ANY OTHER DAMAGES OF ANY KIND WHATSOEVER (INCLUDING, BUT NOT LIMITED TO, LOST PROFITS OR LOST SALES), REGARDLESS WHETHER IT IS BROUGHT AT LAW OR INEQUITY OR ON ANY THEORY OF CONTRACT OR TORT LIABILITY OR ANY OTHER THEORY OF LIABILITY.

FILBUR®

POOL AND SPA FILTRATION

Thank you for choosing FILBUR Manufacturing pool and spa filter cartridges and D.E. grids. We want to be your partner for all of your pool and spa filtration needs. As a valuable partner we want to make your job easier. Listings by cartridge dimensions, manufacturer, and part number in addition to a user-friendly index allow versatile information look-up. You are sure to find the right product for your pool or spa filter system. We've designed this catalog with that in mind, simplifying cartridge and grid reference regardless of the information you have. Listings by cartridge dimensions, manufacturer and part number allow versatile information look-up. And, with a new and improved index along with the most comprehensive line-up of cartridges and grids you are sure to find the right product for your pool or spa filter system.

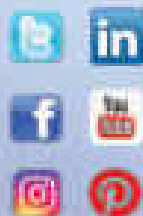

FILBUR® cartridges are made to the highest standards and specifications demanded by original equipment manufacturers (OEMs) of pools and spas. The DirtMaster™ seal assures you that only time-tested, industry-specified media is used. Just look for this seal and you'll know that you are using cartridges that are tested, trusted, and proven.

Extruded PVC cores – the strongest on the market – further add to the dependability of FILBUR cartridges, making them the first choice of pool and spa equipment manufacturers.

FILBUR D.E. grids continue to receive acclaim by customers as the strongest and most durable. With beefy skeletal frames, thick media covers and strong stitching, FILBUR grids are engineered to hold up to multiple cleanings for several seasons. Just look for the blue stitching and you'll know you've found the best.

But, a broad line of quality products is not enough. At FILBUR Manufacturing we build more than cartridges... we build relationships, too. Exceptional customer service, flexibility and on-time shipping reflect our dedication to our partners. A website full of resources – including an interactive Filter Finder tool – help you get out what we put in. Visit www.filburmfg.com. While you're there hit the link to our Facebook, Twitter, YouTube and Pinterest pages and join the conversation. You'll find helpful and interesting information ...and, some fun, too!

Communication is critical to any successful relationship and we expect no less of our partnership. Should you have any questions, specific needs, or recommendations please do not hesitate to call our customer service department toll free at 888-424-9185. We welcome the opportunity to assist you with all of your pool and spa filtration needs.

FILBUR is committed to the best

Which is why our pool and spa filter cartridges are built better to last longer with DirtMaster™

Look for the DirtMaster icon.

It's your assurance of premium filtration media with its maximum dirt-holding capacity and flow for long life.

FILBUR Cartridges with DirtMaster Technology are:

- **Tested**
Subjected to rigorous testing by top spa producers.
- **Trusted**
Consistent, quality materials mean reliable performance.
- **Proven**
Industry standard for over 25 years. Premium media and the strongest cores mean long life and premium

Why FILBUR?

CENTER CORES

SAME FLOW RATE and ENERGY DRAW

(filtering)

STRONGER

WEAKER
(less material in the core, corners prone to cracking)

EXTRUDED PVC CENTER CORES

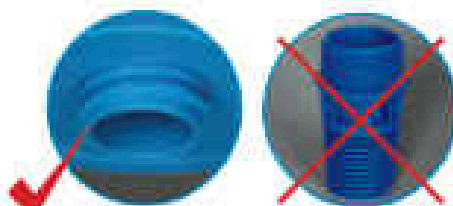

Why does FILBUR use extruded PVC center cores in their cartridges? Because they are the strongest, hands down! Round holes provide for even distribution of stress whereas square holes create a build-up of stress at 90 degree angles resulting in cracking and eventual collapse of the center core and cartridge. Independent testing also confirms **there is no difference in flow rates or energy draw between the 2 types of center cores (left)**. As long as the total area of the holes in the center core are equal to or greater than the opening at the bottom of the end cap there will be no restriction in flow...that's basic hydraulics.

REINFORCED CENTER CORES

Larger FILBUR cartridges incorporate reinforcement "wheels" to allow for increased debris loading and pressure differential while protecting the structural integrity of the cartridge.

END CAPS

INTEGRATED THREADS
(no flow reduction or adapter needed)

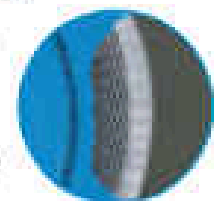

PAD ADAPTER
(decreases flow rates)

THREADS MOLDED DIRECTLY INTO THE END CAP

This makes for easy installation and removal and provides for a structurally sound cartridge. Independent testing confirmed that cartridges using PAD adapters actually decreased flow rates and filtration when compared to cartridges with integrated threads. Adapters create unnecessary restrictions whereas our threaded cartridges allow for the unrestricted flow of water.

★ REINFORCED ANTIMICROBIAL END CAPS

Screen mesh is inserted directly into the end cap which provides for added strength and integrity. Think about rebar in concrete, it's the same principal. Antimicrobial end caps repel odor causing bacteria and mold and are highly resistant to chemicals commonly found in pool and spa applications.

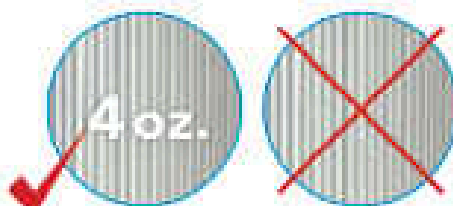

EMBOSSED PART NUMBERS

This allows for easy identification and re-ordering. They should be clearly molded into the end cap.

FILTER ME-

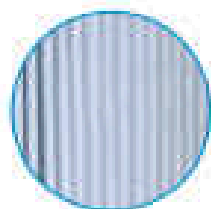

4-OUNCE FILTER MEDIA

FILBUR pool cartridges use 4oz. weight industry-specified media. This is the OEM spec and the NSF[®] requirement for turbidity reduction in pool applications. By substituting 4oz. media with 3oz. media you are allowing more debris to pass through the filter creating cloudy, less clear water. You also greatly shorten the cycle time between cleanings and the overall life of the filter by using 3oz. media in pool applications. Check the spec and demand the best for your customer! (While the 3oz. media is the standard for portable spa filters we do not recommend using this for pool filter applications.)

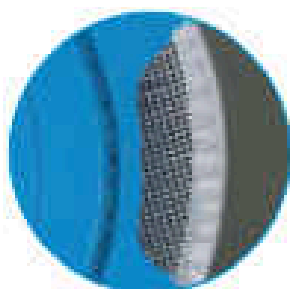

Anatomy of a FILBUR Cartridge

Identifying a Filter Cartridge

Visit the
Filter Finder on
filburnfg.com

HOW TO FIND A REPLACEMENT CARTRIDGE FOR YOUR POOL OR SPA

- Measure the outside diameter of the cartridge in inches (+/- 1/16).
- Measure the overall length of the cartridge in inches (+/- 1/16), including the end caps. Do not include any handles, strings, etc. A more accurate measurement is made by measuring through the center of the cartridge when possible.
- If the top and/or bottom is open, measure the inside diameter of the opening (+/- 1/16 inch). If the end cap is closed make note of its identifying features (i.e. 'Handle', 'Cone', etc.).
- Make note of the manufacturer (OEM) and model number of the filter into which the replacement cartridge will be installed.
- Take note whether or not there is a center core (PVC pipe in center). Also count the number of pleats (+/- 2).

The FILBURN Catalog for replacement cartridges is divided into two sections: Dimensional and by Pool/Spa Manufacturer. The cartridges are listed alphabetically by original manufacturer, and then each cartridge for that manufacturer is listed from the smallest O.D. (outside diameter) to the largest, then by overall length, top (measurement or handle, etc.), bottom diameter, and description (manufac-

HOW TO COMPUTE THE SQUARE FOOTAGE OF A CARTRIDGE

- Count the number of pleats and measure the pleat depth in inches.
- Measure the length of the cartridge in inches excluding the end caps.
- Multiply the number of pleats by 2 and multiply that number by the pleat depth. Multiply the total by the length of the cartridge (excluding the end caps) and divide that number by 144.

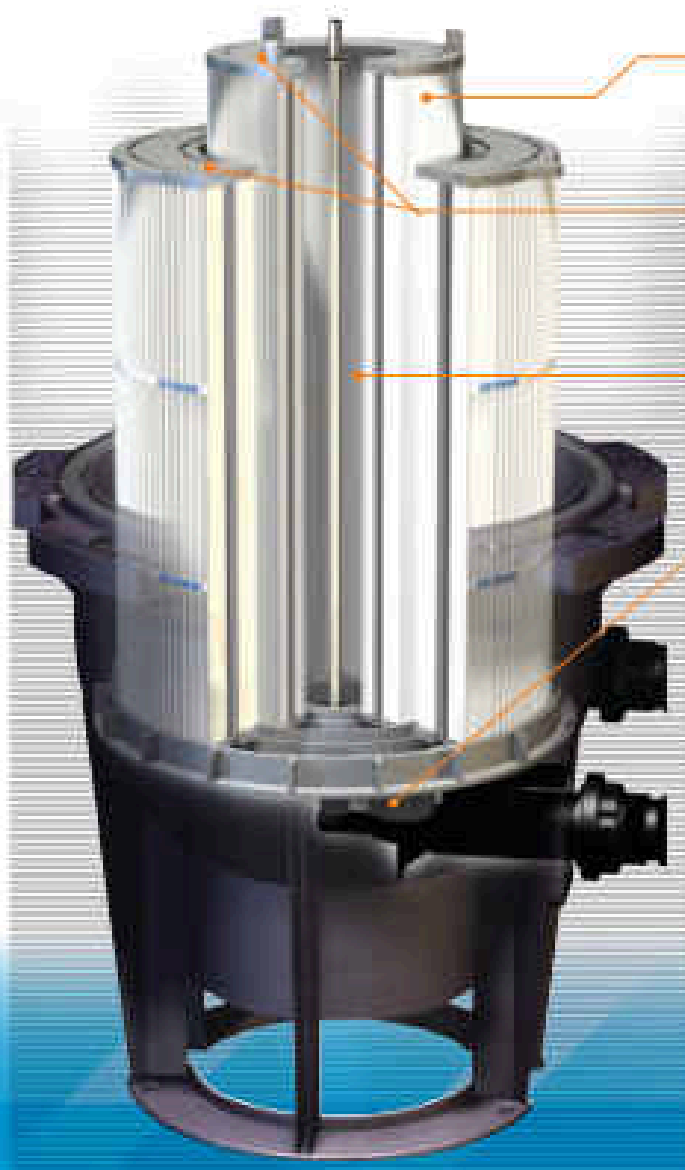

of Pleats X 2 X Pleat Depth X Pleat Length ÷ 144 = cartridge square footage

Example:

$$\begin{array}{|c|} \hline \# \text{ of pleats} \\ \hline 100 \\ \hline \end{array} \times 2 \times \begin{array}{|c|} \hline \text{pleat depth} \\ \hline 0.750 \\ \hline \end{array} \times \begin{array}{|c|} \hline \text{length} \\ \hline 12.25 \\ \hline \end{array} \div 144 = 12.76$$

Why ECO3 from FILBUR?

The New/Smart/Easy Choice for System:3® Replacement Cartridges

- Professional-grade filtration fabric – premium dirt-holding
- Durable end caps resist chemicals and heat
- High strength inner cores provide maximum flow
- Rugged retrofit manifold comes packaged with filter

Contact your pool and spa distributor
or call FILBUR at 888-424-9185.

FILBUR
POOL AND SPA FILTRATION

- ✓ The same unique flow design as the original
- ✓ The same professional-grade filtration fabric
- ✓ Superior FILBUR DirtMaster technology
- ✓ Guaranteed savings

FILBUR's ECO3 Retrofit offers you a smart choice. It features the same unique flow design as the original, but with cartridge replacement options that guarantee savings. Plus FILBUR's ECO3 Retrofit features superior FILBUR DirtMaster technology: professional-grade filtration fabric for premium dirt-holding.

Why DirtMaster Technology?

- Professional-grade filtration fabric
- Premium end caps
- The strongest high-flow cores in the industry
- Tested. Trusted. Proven.

MICRO-KLEAN™ FILL FILTERS

Filter your water before you fill your pool or spa with the Micro-Klean fill cartridges. Available in both a pleated and disposable version these filters reduce total dissolved solids (TDS) from your water and increase the quality of your pool or spa water.

- Attaches to the end of any garden hose.
- Extends filter life.
- Removes solids from water.
- Reduces hard mineral deposits.
- Easier to balance chemicals from the start.
- Great for plaster crews!

POOL & SPA CARTRIDGES

FILBUR Manufacturing filter cartridges and grids are produced to exact strict OEM specifications. Don't be fooled by cheap imitations. Demand cartridges that are produced with industry-specified filter media and the strongest cores in the industry. FILBUR Freedom cartridges feature exclusive Microban® antimicrobial filter media. All FILBUR cartridges carry a one year warranty.

FILBUR®
POOL AND SPA FILTRATION

PREMIUM ANTIMICROBIAL CARTRIDGES

FILBUR Freedom™

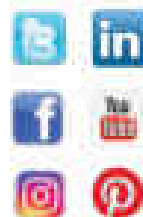

At FILBUR, we're focused on value.

And our blue, FILBUR Freedom antimicrobial cartridges are a case in point. We recognize the value this breakthrough technology brings to the industry, keeping pool and spa water cleaner, clearer, more protected. Here's how it works:

- Antimicrobial protection prevents the growth of bacteria on cartridges.
- Less bacteria means fewer odors, algae, and mold that can foul a cartridge and contaminate water.
- Applied during the manufacturing process, antimicrobial protection will not wash out or wear away. It lasts as long as the cartridge itself.
- When microorganisms come in contact with the treated blue filter media, they are no longer able to function, grow, or reproduce.

Available in more than 50 sizes, FILBUR Freedom cartridges offer the same strength, durability, and reliability as the original FILBUR material and are easier to clean than any other filter. Their distinct blue color makes them easy to differentiate from other cartridges and easily identifies them as antimicrobial. FILBUR Freedom cartridges carry a one-year warranty.

FLBUSH does not consider all cross-references of equal quality/construction due to media deviations from OEM specifications by Pleco.

When & How to Clean your Filter Cartridge

WHEN:

When the pressure gauge on your filter tank reaches 8 p.s.i. above the pressure recorded when a new cartridge is installed, or when there is a noticeable decrease in the pressure coming from your return jets, it is time to clean your cartridge.

HOW:

1. Turn the power off to your pump and bleed the excess air pressure of the system using the air valve on the filter. Remove any band clamps and/or lids to your filter. Remove the cartridge from the filter canister and dislodge any loose debris by directing a stream of water from a garden hose between each pleat. Do not use a high pressure car wash wand or a stiff brush to clean your cartridge. These abrasive methods may damage the filter media and snap the bands.
2. Spray Pure 'n Clean™ filter cleaner on the cartridge or grid to remove any oils or other organics. If stubborn stains persist, soak the cartridge overnight in a solution of TSP.
3. Rinse the cartridge thoroughly with clean fresh water and return it to the filter tank. Secure the tank lid and any band clamps completely and restart your filtration system per manufacturers instructions.

CAUTION

- Follow your filter equipment manufacturer's instructions when removing or re-installing your filter cartridge.
- Always shut down your system before working on your cartridges.
- We recommend against acid washing filter or using a pressure washer to clean the media.

Cartridges by Pool/Spa Manufacturer

This section details the cartridges available by Original Equipment Manufacturer (OEM). You will find in alphabetical order the listing of both pool and spa manufacturers. We have combined both pool and spa sections into one quick and easy cross reference. All FILBUR cartridges include the features listed below:

- OEM specified media.
- Straight, sharp and evenly spaced pleats for maximum filtration efficiency.
- Durable polyurethane end caps which provide strength and assure proper sealing in filter tank.
- Drilled PVC center cores for the strongest cores in the industry. PVC center core for support.
- Evenly spaced holes in center core for maximum distribution of flow through the cartridge.

MICRO-KLEAN™ FILL FILTERS

Filter your water before you fill your pool or spa with the Micro-Klean fill cartridges. Available in both a pleated and disposable version these filters reduce total dissolved solids (TDS) from your water and increase the quality of your pool or spa water.

- Attaches to the end of any garden hose.
- Reduces hard mineral deposits.
- Extends filter life.
- Easier to balance chemicals from the start.
- Removes solids from water.

DIATOMACEOUS EARTH (D.E.) GRIDS

FILBUR genuine replacement grids are designed for Diatomaceous Earth (D.E.) filter applications. All grids are constructed with a special reinforced center core for added durability. Seams are stitched with heavy duty, chemical resistant string and are sonic welded to prevent fraying. Proprietary grid cloth stands up to more backwashing than the competition.

ENGINEERING DATA & MEASUREMENTS

$$\text{Flow Rate} = \frac{\text{Volume}}{\text{Time}}$$

$$\text{Volume} = L \times W \times H$$

$$\text{Area of a rectangle} = L \times W$$

$$\text{Area of a Circle} = \pi r^2$$

$$\pi \approx 3.141592\dots$$

$$\text{Circumference of a Circle} = 2 \pi r$$

$$\text{Volume of a Cylinder} = \pi r^2 h$$

Understanding Micron Ratings for Fluid Filters

A micron rating for a fluid filter is a generalized way of indicating the ability of the filter to remove contaminants by the size of the particles. **AIR FILTERS ARE NOT RATED BY MICRON SIZE.**

The micron rating does not properly and fully describe either the efficiency or the contaminant-holding capacity of the filter.

What does the word micron mean?

It is a unit of linear measure in the metric system used to measure distance from one point to another. It is used like the inch, foot, centimeter and millimeter to measure the length, width, or diameter of objects.

A filter that is marked "10 microns" has some capability in capturing particles as small as 10 microns. However, there is no one accepted method to measure and describe the size of particles that a filter can capture or the total amount of particles that the filter can hold.

When you see the filter marked "10 microns," you will not know exactly what this means unless you also have a description of the test and standards used to determine the filter rating.

Filter micron ratings are often based on one of these methods, but with possible variations:

- A. Nominal Micron Ratings
- B. Absolute Micron Ratings
- C. Multi-Pass Beta Ratings

A. Nominal Micron Rating usually means the filter can capture a given percentage of particles of the stated size. For example, a filter might be said to have a nominal rating of 90%, 10 micron size.

B. Absolute Micron Rating is a single pass test and is usually obtained by passing fluid containing glass beads through a flat sheet of the filter material. Any beads that pass through are captured and measured.

C. Multi-Pass Beta Rating has been accepted by many machinery manufacturers, as well as filter manufacturers, especially for filters used in fluid power applications; hydraulics, controls, transmissions, power steering and so forth.

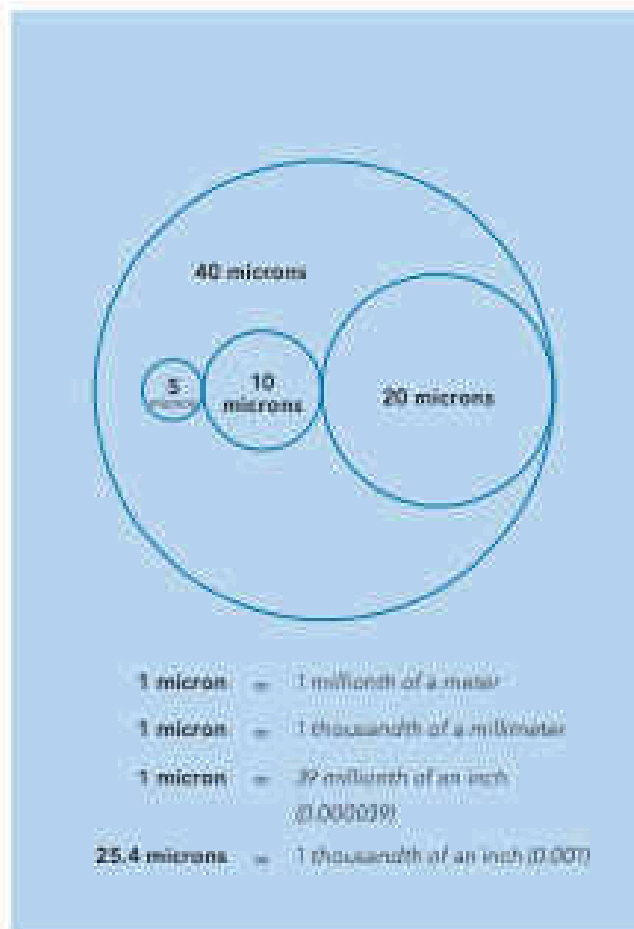

The test uses contaminant specially graded by particle sizes added regularly in measured quantities to the fluid which is pumped continuously through the filter.

Measured samples of fluid are taken at timed intervals upstream and downstream of the filter. The contaminant in these samples is measured for particle sizes and the quantity of each size or ranges of sizes.

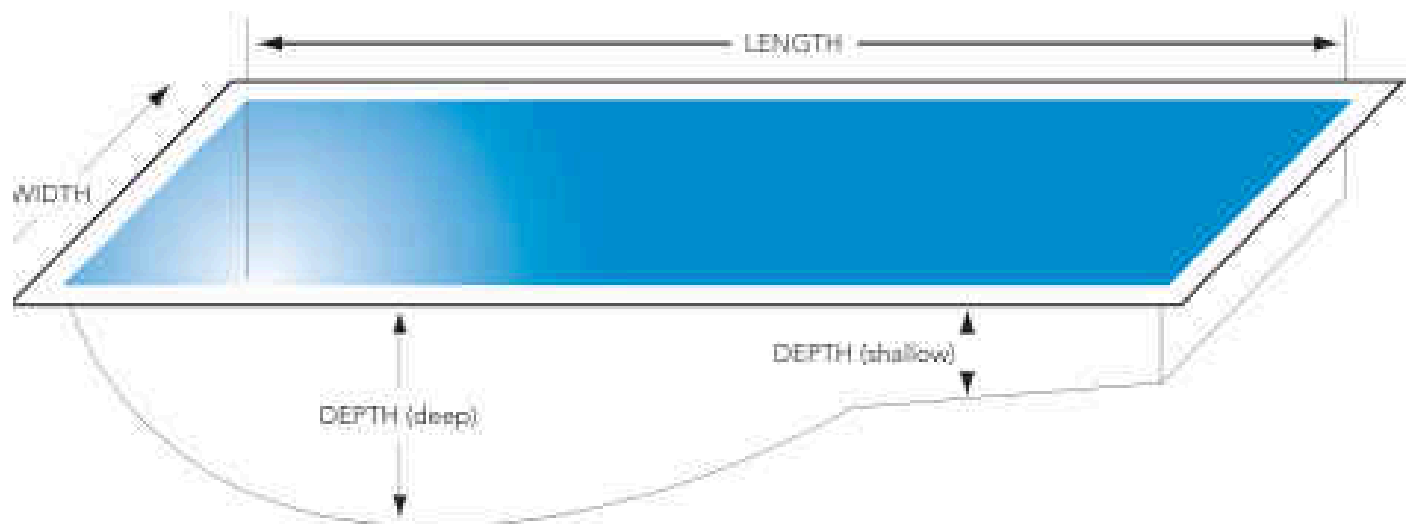

A ratio is then made for the intended micron rating. An example: Particles upstream 10 microns and larger. Particles downstream 10 microns and larger. The Beta ratio would then be stated as Beta = 20.

The multi-pass Beta ratio is accepted by many machinery manufacturers but not used in a public way by most of them to identify or specify their filters. Some suggestions:

1. Use filters of high quality.
2. Obtain filters by catalog listing, not just by "micron rating". Other important qualities should also be considered.
3. Pay close attention to service intervals and good service practices for the greatest economy of operation.

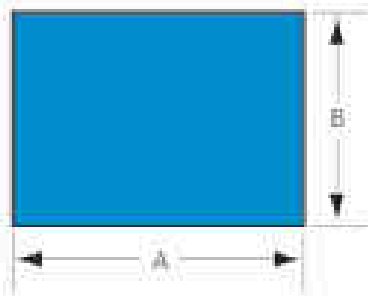

Estimating Total Gallons in a Pool or Spa

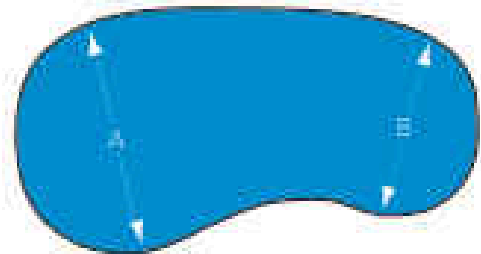

Example
 Pool Length = 40 ft
 Pool Width = 20 ft
 Shallow Depth = 3 ft
 Deep Depth = 8 ft
 Total Depth = 11 ft

Using formula A:

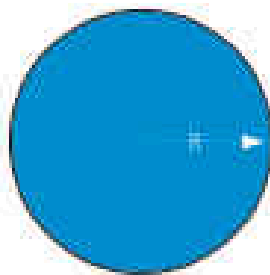

- 1) $40 \times 20 = 800 \text{ sq ft}$
- 2) $800 \times 5.5 = 4400 \text{ cubic ft}$
- 3) $4400 \times 7.5 = 33000 \text{ gallons}$

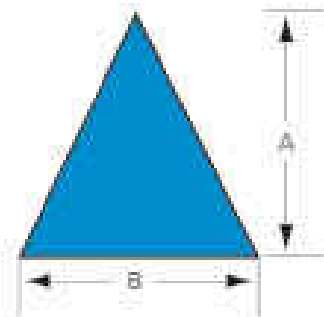

$$\text{AREA} = A \times B$$

$$\text{AREA} = .45 \times (A + B) \times C$$

$$\text{AREA} = 3.14 \times R \times R$$

$$\text{AREA} = A \times B \div 2$$

The area in square feet for pools and spas can be determined by using one or more of the above formulas.

Circumference = distance around outside of pipe

$$\text{AMPERAGE} = \text{WATTS} \div \text{VOLTS}$$

$$\text{WATTS} = \text{VOLTS} \times \text{AMPERAGE}$$

CAN CUSTOMER LOYALTY SOMETIMES SEEM A LITTLE RADICAL?

There are a lot of reasons that our customers hit the road with FILBUR's DirtMaster filter cartridges. Reasons like stronger, reinforced cores; antimicrobial end caps; wider support bands; and high-quality, dirt-holding polyester media. All of which add up to make DirtMaster cartridges better built, longer lasting, number one with OEMs, and radically superior.

Join our DirtMaster Dealer Program and get rewarded on every pool cartridge sold.

USE THE FILTER CARTRIDGES THAT HOLD MORE DIRT.

FILBUR Pool & Spa Cartridges with DirtMaster Technology are number one with OEMs. The professional grade, OEM-specified fabric is heavier and thicker, with more fibers to collect dirt. Better dirt-holding cartridges mean less debris in the water, fewer chemicals, and shorter pump runs. And that means less cartridge cleaning, less energy used, and less money spent – for much happier customers.

Also available: filter media with Microban® antimicrobial protection.
