VS PLUSHP
VARIABLE-SPEED PUMP

Intelligent Pump Design.

- **No Rewiring Necessary**

Auto-sensing dual-voltage motor automatically recognizes and adapts to 115V or 208-230V power supplies.

- **Programmable Auxiliary Relays for Instant Automation**

Two programmable auxiliary relays allow the pump to control other equipment, such as a salt chlorinator and booster pump, without a separate timeclock.

- **Space Saving Design**

Zero Clearance TEFC motor pulls in cooler air from the side of the motor instead of the back, allowing for compact installation against walls or other tight setups.

- **Additional Features**

- › 40% larger strainer basket than the leading competitor for greater pool owner convenience and improved efficiency when loaded with debris
- › 2" x 2.5" unions included for easy installation and maintenance with no hidden costs
- › Easy Controller Setup auto detects connection to an automation system or a traditional controller, eliminating the need to adjust settings manually
- › RS485 Quick Connect Port for faster installation and maintenance
- › Dry Contact Relay Control
- › Ergonomic carry handle for easy installation
- › Tool-free lid allows for quick and easy cleaning of the pump basket

- **Compatible with Pentair® Automation System**

SpeedSet Plus allows Jandy VS Pumps to operate on these Pentair® Automation Systems:⁴

- › IntelliCenter® & IntelliCenter Lite
- › EasyTouch® PL⁴ & PSL⁴
- › IntelliTouch®

DV2ASP Model Includes SpeedSet Plus Controller

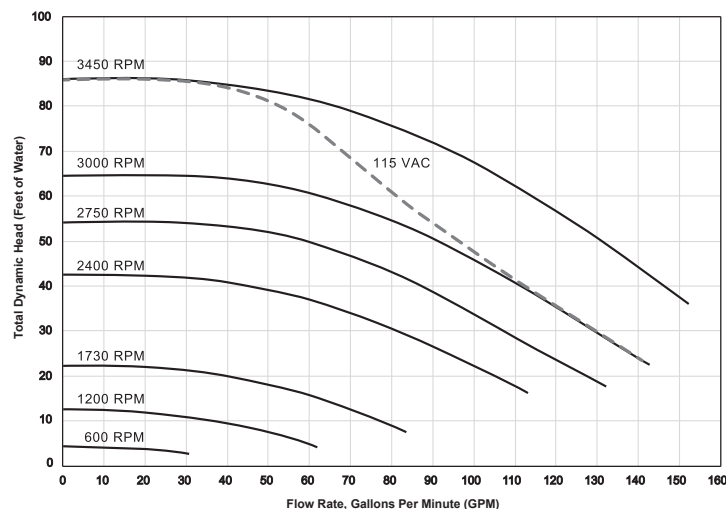

MODELS

Model No.	Option Description
VSPHP270DV2ASP	VS PlusHP 2.7 HP, SpeedSet Plus Controller Preinstalled
VSPHP270DV2A	VS PlusHP 2.7 HP, Controller Sold Separately

PERFORMANCE

DIMENSIONS

¹Auxiliary relays on all Jandy DV2A and DV2ASP pump models are programmable when paired with a Jandy SpeedSet or iQPUMP01 variable-speed pump controller.

²WEF = weighted energy factor in kgal/kWh. WEF is a performance-based metric adopted by the Department of Energy to characterize the energy performance of dedicated-purpose pool pumps. Department of Energy 10 CFR Parts 429 and 431.

³Always follow local building and safety codes for pipe sizing and guidelines.

⁴Flow control is NOT supported.
