

THE CLEAR CHOICE FOR ALL POOLS

OFFICIAL POOL EQUIPMENT SUPPLIER

USA SWIMMING

TRUCLEAR® XL
SALT CHLORINATOR

A high-quality salt system designed for bigger pools

Big, beautiful pools need a large output of chlorine to keep them clean and clear. The TruClear® XL system is certified to deliver chlorine for pools up to 45,000 gallons.

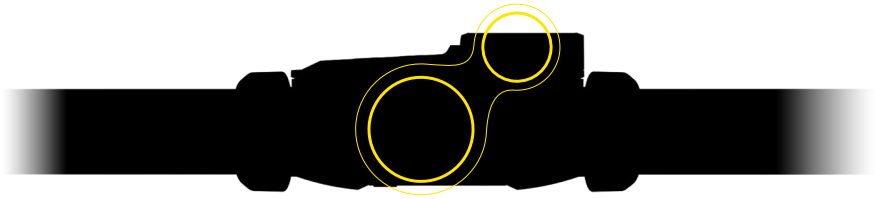

On The Level

Sturdy cell has a built-in level sensor with LEDs to confirm it's positioned correctly.

Less Fuss

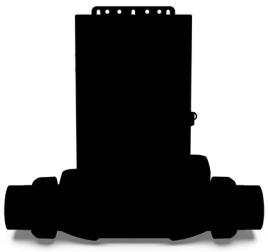

Auto-reversing polarity and more water flow between the plates greatly reduces calcium buildup on the salt cell blades so less maintenance is required.

Flow Detection

Dual gas traps work to prevent chlorine production when water isn't flowing

Temperature Compensation

To preserve the longevity of the salt cell, TruClear XL automatically reduces chlorine output at low temperature ranges when less chlorine is needed.

Better Together

TruClear XL works in conjunction with Jandy® X-Series AOP Systems, TruGuard™ Mineral Sanitizer and TruDose™ Chemical Controller.

PRODUCT SPECIFICATIONS

- Designed for larger pools; up to 45,000 gallons
- Dual gas traps prevent chlorine production when pump is not running
- Tool-free twist-lock cord connector for one-step, foolproof electrical connection to the power pack
- Smart cell with cell authentication
- Compatible with variable-speed pumps—requires only 30 GPM
- 120/240 VAC, 60 Hz
- Required salinity is 3,000 PPM
- Comes with unions for both new construction and retrofit installations
- iAquaLink® app control when used with AquaLink® Automation Systems
- 3-Year Standard Limited Warranty
- 12" L (without unions, direct retrofit of AquaPure cell) / 16.5" L (with unions) / 3.5" W
