VS FLOPRO™
VARIABLE-SPEED PUMP

Built Small. Built Strong. Built Jandy.®

With a 20% improvement in hydraulic performance[1], dual voltage capability, plus two auxiliary relays, the VS FloPro™ delivers more possibilities than ever before.

- **Powerful Performance**
  The improved VS FloPro 2.7HP now generates higher head pressure and flow rates to accommodate large pool and spa designs with features such as waterfalls, jets, in-floor cleaning and solar heating systems.
- **Programmable Auxiliary Relays for Instant Automation**
  Two programmable[2] auxiliary relays allow the pump to control other equipment, such as a salt chlorinator and booster pump, without a separate timeclock.

- **115V/208-230V Dual Voltage Capability**
  The ability to operate with either 115V or 208-230V power sources provides installation flexibility and eliminates expensive main power rewiring, making the VS FloPro 2.7HP the ideal aftermarket replacement pump.
- **Lower Electricity Costs**
  Save over $1,100[3] per year in energy costs! The variable-speed motor allows for dramatic energy savings and quieter operation.
- **Compatible with Pentair® Automation Systems**
  The preinstalled SpeedSet™ Plus pump controller allows Jandy VS FloPro 2.7 to operate on these Pentair® Automation Systems:[4]
  - › IntelliCenter® & IntelliCenter Lite
  - › EasyTouch® PL4 & PSL4
  - › IntelliTouch®
- **Additional Features**
  - › Adjustable base for seamless direct replacement of a variety of other pumps in the aftermarket
  - › Zero Clearance TEFC Motor for cool, quiet operation in tight spaces
  - › 2" unions included or utilize 2" internal threads
  - › Easy Controller Setup auto detects connection to an automation system or a traditional controller, eliminating the need to adjust settings manually
  - › RS485 Quick Connect Port for faster installation and maintenance
  - › Four-Speed Dry Contact Relay Control
  - › Tool-free lid for easy debris removal
  - › Ergonomic easy-transport handle

MODELS

Model No.	Option Description
VSFHP270DV2ASP	VS FloPro 2.7 HP, SpeedSet Plus Controller Preinstalled
VSFHP270DV2A	VS FloPro 2.7 HP, Controller Sold Separately

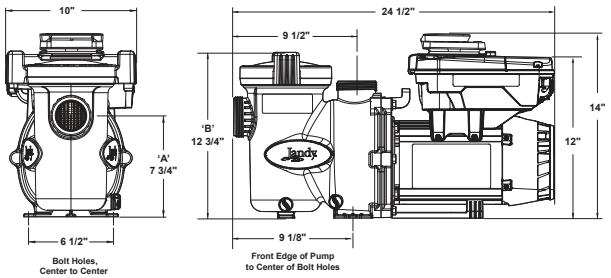

SPECIFICATIONS

Model No.	THP	WEF[5]	Voltage	Max Watts	Amps	Union Size	Rec. Pipe Size[6]	Carton Weight	Overall Length
VSFHP270DV2A(SP)	2.70	7.3 8.7	208-230V 115V	2,550W 1,840W	11.5-10.5 16.0	2"	2" - 3"	53 lbs.	24½"

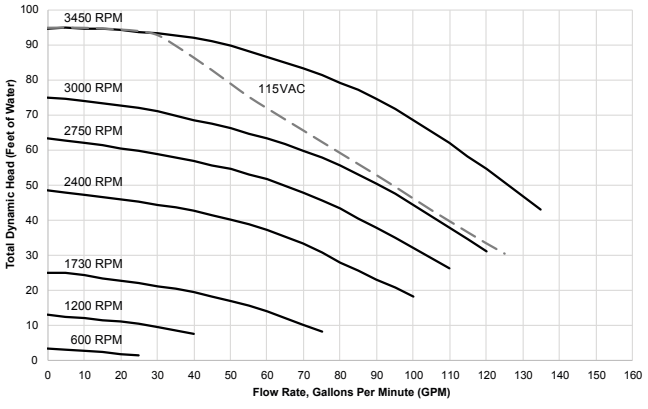

ADJUSTABLE BASE CONFIGURATIONS[7]

Base	Fits	'A' Dimension	'B' Dimension
No Base	Hayward®, Pentair® SuperFlo®, Sta-Rite® SuperMax®	7¾"	12¾"
Small Base	Hayward Super II™, Jandy PlusHP and Max HP Pumps	8⅞"	13⅞"
Small Base with Spacers	Pentair WhisperFlo® and IntelliFlo® VSF, Sta-Rite Dyna-Glas™	9⅛"	14⅛"
Small Base + Large Base	Sta-Rite Max-E-Pro®, Sta-Rite Dura-Glas®, Sta-Rite Dura-Glas II, Sta-Rite Max-E-Glas	10¾"	15¾"

DIMENSIONS

PERFORMANCE

[1] Hydraulic Horsepower of VSFHP270DV2A(SP) model compared to previous VSFHP270AUT / VSFHP270JEP models as measured on system curve C at 3450 RPM.
[2] Auxiliary relays on all Jandy DV2A and DV2ASP pump models are programmable when paired with a Jandy SpeedSet Plus or iQPUMP01 variable-speed pump controller
[3] Based on a 28,000 gallon pool with two turnovers per day at an energy cost of $0.195/kWh vs. comparable single speed pumps; when tested in accordance with the applicable requirements of 10 CFR 429.
[4] Flow control is NOT supported.
[5] WEF = weighted energy factor in kgal/kWh. WEF is a performance-based metric adopted by the Department of Energy to characterize the energy performance of dedicated-purpose pool pumps. Department of Energy 10 CFR Parts 429 and 431.
[6] Always follow local building and safety codes for pipe sizing and guidelines
[7] Small base with spacers included with all FloPro pumps. Large base is optional part R0546400.
