SUPCO PART NO. WG24

- ✓ Low voltage overflow switch wired to the 24v transformer of an A/C or furnace
- ✓ Shuts the system down in the event of water leakage
- ✓ Can be wired to send a signal to an external alarm and alert you of a condensate pump malfunction or clogged drain pipe
- ✓ Equipped with LED indicators

Hermetically Sealed Electronic Water Alarm

This hermetically sealed electronic water alarm is a low voltage overflow switch wired to the 24v transformer of an A/C or furnace. It's designed to shut down the system and prevent water damage to expensive equipment. As an additional safety mechanism, it can be wired to send a signal to an external alarm and alert you of a condensate pump malfunction or drain pipe clogging. The alarm comes equipped with LED indicators: **green** for normal operation and **red** for an alarm condition.

PRODUCT SPECIFICATIONS
